

Course Summary: Emergency Procedures

Course summary:

Number of Delegates: 12		
Session	Timings (Minutes)	Content
	Prior to start of course	Identity and License Checks, Course Administration,
		Housekeeping and Prior Knowledge Questionnaire
1	5	Aims and Objectives
2	25	Legal Responsibilities
3	45	Journey Planning
4	15	Assessing situations
5	30	Vehicle Collisions
6	30	Adverse Weather
7	30	Tyre Safety & Skid Control
8	140	Fire & Evacuation:
		- Common causes of vehicle fires
		- How to reduce the risk of vehicle fire
		- When and how to use a fire extinguisher
1		- How to safely evacuate a vehicle S.M.O.K.E

Course details:

Session Content	Number of Delegates: 12			
Questionnaire Course welcome Data Protection Health and Safety Coccupational road risk Duty of Care Staying Safe Preparing for different types of journeys – group work looking at different considerations you must make before making a journey When something goes wrong – group work looking at a series of pictures where an incident has happened. The group will assess the situation and take the safest course of action Assessing the situation Motorways and Dual Carriageways Ordinary roads Using the quiz drivers will look at answering questions about different types of weather conditions Tread depths Stopping distances What to do if you skid What to do if your tyre bursts Learn the S.M.O.K.E acronym Vehicle fire hazards Reducing the risks Fire extinguishers Evacuating passengers in wheelchairs Fractured spine Duty of care First aid Moving casualties Fractured spine Planning for a long journey Planning a journey in winter Preparing for problems that might arise Individual passes on the topics covered	Session	Content		
 Course welcome Objectives of the course Data Protection Health and Safety Occupational road risk Duty of Care Staying Safe Preparing for different types of journeys – group work looking at different considerations you must make before making a journey When something goes wrong – group work looking at a series of pictures where an incident has happened. The group will assess the situation and take the safest course of action Motorways and Dual Carriageways Ordinary roads Using the quiz drivers will look at answering questions about different types of weather conditions Tyre safety Tread depths Stopping distances What to do if you skid What to do if your tyre bursts Learn the S.M.O.K.E acronym Vehicle fire hazards Reducing the risks Fire extinguishers Evacuating passengers Evacuating passengers Evacuating passengers in wheelchairs Practical exercises Duty of care First aid Moving casualties Fractured spine Planning for a daily journey Planning a journey in winter Preparing for problems that might arise End of course discussion on the topics covered		Identity and License Checks, Course Administration, Housekeeping and Prior Knowledge		
Objectives of the course Data Protection Health and Safety Occupational road risk Duty of Care Staying Safe Preparing for different types of journeys – group work looking at different considerations you must make before making a journey When something goes wrong – group work looking at a series of pictures where an incident has happened. The group will assess the situation and take the safest course of action Assessing the situation Motorways and Dual Carriageways Ordinary roads Using the quiz drivers will look at answering questions about different types of weather conditions Terad depths Stopping distances What to do if you skid What to do if you skid What to do if your tyre bursts Reducing the risks Fire extinguishers Evacuating passengers Evacuating passengers Evacuating passengers Evacuating passengers Fractured spine Duty of care First aid Moving casualties Fractured spine Planning for a long journey Planning for a daily journey Planning for problems that might arise Indicate the survey of the preparing for problems that might arise End of course discussion on the topics covered		Questionnaire
